Table 1B - Count of Top 2011 Inpatient Admissions

Admissions displayed include each community hospital's top inpatient admissions by volume. These pages provide the number of cases for these admissions for the period of 10/1/10 to 9/30/11. For individual hospitals, diagnoses having fewer than 15 cases are excluded. Hospital System Number of Cases and Average Gross Charges include all hospitals. Blanks in the table indicate that the hospital has fewer than 15 admissions for the diagnosis or the hospital does not admit patients with that particular diagnosis. The hospital, however, may admit patients with similar diagnoses under a different code which may not be shown. Treating a given diagnosis may entail more than one procedure. Please call the hospital for more information.

* "Major Diagnostic Category" (MDC) is a grouping of similar MS-DRGs, such as all those affecting a given organ system of the body.

"No data" indicates that no diagnosis in that particular grouping meets the minimum limits based on the methodology described above.
